-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis for "the tubes" (claim 4, line 2). It is pointed out that the limitation "tubes" was described in claim 2, and it appears that claim 4 should depend on claim 2.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Nelson (4,740,025).

Nelson (4,740,025) discloses a gripper device, comprising an open/close driver ((Fig. 2) and a pair of holding members (Fig. 2) which are opened and closed by

Art Unit: 3652

the open/close driver and provided to hold a glass container or specimen container from an outer surface thereof, wherein each of the holding members formed by bending a linear member (Fig. 2) having elasticity and includes a pair support sections which extend in parallel along the outer surface of the specimen container, one end of each the support sections being coupled to a drive end of the open/close driver, a pair of container contact sections (24,24) which are connected at one end to the support sections, respectively and bent and biased toward the outer surface of the specimen container, and a coupling section (30,30) (see Fig. 1) or metal wires which couples other ends of the container contact sections and are curved so as to surround the outer surface of the specimen container with a given gap therebetween (see Fig. 1), and cylindrical shaped pads (28) (Fig. 4), which can be considered as tubes, being made of resilient material, resin, or polyurethane (Col 2, lines 11-27).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Russell (3,462,184) and Filipiak (2,204,482) show a resilient gripper to conform the outer surface of a circular shaped object.
